Project Design Phase-II Solution Requirements (Functional & Non-functional)

Date	06 March 2025
Team ID	SWTID1741156497
Project Name	Crypto currency
Maximum Marks	4 Marks

TEAM LEADER	KALAIYARASI P
TEAM MEMBER 1	HEMALATHA R
TEAM MEMBER 2	KAVIYA A
TEAM MEMBER 3	PRAVEEN S

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Crypto Currencies and	Search for crypto currencies
	Discovery	
		Top 10 crypto currencies on home page
FR-2	Price chart	You can see the price chart of specific crypto currency
		in it
FR-3	Admin Management	Manage Users and Accounts
		Monitor System Analytics

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The app should have an intuitive and user-friendly
		interface, ensuring smooth.
NFR-2	Security	API Requests must be secured. The app should
		prevent unauthorized .
NFR-3	Reliability	The app should ensure a consistent and
		uninterrupted experience, minimizing crashes and
		downtime.
NFR-4	Performance	Crypto currencies should load with minimal
		buffering. The app should respond to user
		interactions (search, price chart) within 2 seconds

NFR-5	Availability	The system should maintain an uptime of at least 99.9%, ensuring accessibility across different time zones.
NFR-6	Scalability	The app should handle increasing numbers of users and concurrent streams efficiently without performance degradation. The architecture should support future feature expansion.
